

Modernized Rating and Pay Performance System

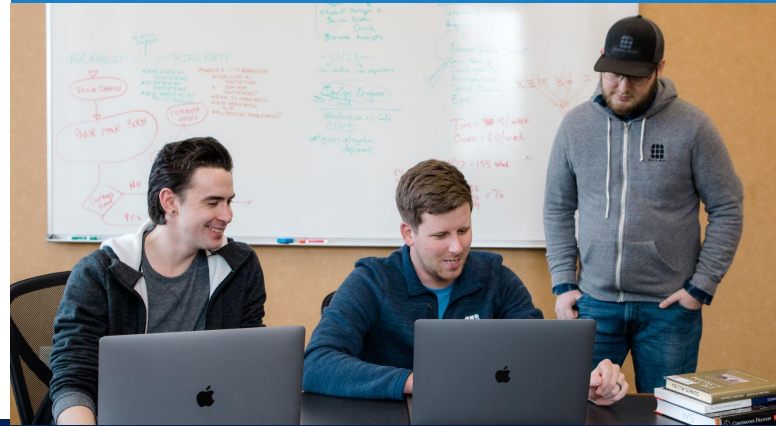

SUMMARY

Our client, a government run national health system, partnered with Source Allies to modernize their rating and pay-for-performance system for all doctors across the country. Our client received an engineering award for the success of the engineering design of this highly flexible Payment Information Calculation System (PICS) we built to support the client's existing quality reporting system contract.

TECH STACK: Mule ESB, Java, Spring, Puppet, Docker

“ We turned to Source Allies because we needed to partner with high level software consultancy in order to deliver the end product. This allowed us to ramp up quickly and take ownership of deliverables for this large scale project. ”
